Product Descriptions:

PRODUCT	DESCRIPTION
National Record Indicator with Sex Offender Index	The National Record Indicator is a database compiled of criminal records for 44 states and the District of Columbia. Information reported from the database can vary significantly from state to state. The National Record Indicator also includes State Sex Offender Registries from all 50 US states. As per FCRA Guidelines, any records that show on the NRI, will be confirmed on the county level. There will be no additional charge for the county confirmation. For more detailed information concerning the availability of records from each state within the National Record Indicator, please contact your Account Representative. <i>Please note that criminal records from all states are not available on the Nationwide Record Indicator (for example: North Carolina Criminal records are no longer provided due to state legislation).</i>
Social Security Alert	A social security alert reports any names that are associated with a particular social security number.
Residency History	A residency history provides a detailed account of an applicant's prior addresses and establishes a road map of where to search for an applicant's criminal history.
